

# Technical Data Sheet

## Easy-In Rotor Assembly Grease

### Description:

Easy-In rotor / stator assembly grease is designed to reduce the required force of rotor installation by 75%. Easy-In is completely safe for Rubber, Latex, Buna, Viton and all plastics such as Delrin, Teflon and Nylons. Easy-In rotor / stator assembly grease is engineered to wash out of rotor / stator assemblies immediately once tested or downhole.

### Features:

- Provides lubricity for easy rotor / stator assembly
- 100% synthetic
- Safe for Rubber, Latex, Buna, Viton and all plastics such as Delrin, Teflon and Nylons
- Environmentally Friendly
- Non-melting
- Rotor Grease is designed to wash away immediately
- Reduces assembly friction by 75%

### Physical Properties:

- Color .....Clear / White
- Temperature Range .....-20F - 450F
- Consistency, Cone Penetration (D-217), ..... 210 to 240
- Drop Point, °C ..... None
- Thickener ..... Inorganic
