

Technical Data Sheet

Everlast 1000 (EVK)

High Temp Valve Lubricant/Anti-Seize

Description:

A water-resistant synthetic valve lubricant and anti-seize for use in extreme high temperature environments such as geothermal applications. Not recommended for hydrocarbon service.

Applications:

For use in extreme high temperature ball, plug and gate valves.

Features:

- 100% synthetic
- Converts to a solid film lubricant at elevated temperatures
- Water resistant

Physical Properties:

- ColorBlack
- Temperature Range-20 to 1000°F
- Consistency, Cone Penetration (D-217) 200 to 225
- Drop Point, °C None
- Thickener Inorganic
