

Technical Data Sheet

FORMASIL WR

Valve Sealant

Description:

Sealant for use in valves carrying CO₂, H₂S, methanol, crude oil, produced waters, strong acids, and natural gas where extreme temperature swings may occur. Formasil WR is highly chemical resistant, has a wide temperature range and is fortified with antirust, antiwear, and corrosion inhibitors.

Applications:

Valves in Arctic Climates. For use in plug, gate and ball valves. Suitable for use in hydrocarbon gases. DO NOT use in oxygen service.

Features:

- 100% synthetic
- Water resistant
- High metal adhesion
- Excellent corrosion resistance
- Inhibited for H₂S

Physical Properties:

- Temperature Range -55 to 450 F
