

Technical Data Sheet

Fractastic HV

Frack Valve Lubricant

Description:

Fractastic HV is high viscosity grease resistant to water, acids, friction reducers, polymers, hydrocarbons and co-solvents commonly used in fracking operations. Fractastic HV is inhibited against acid corrosion.

Applications:

For use in frack valves and pressure control applications.

Features:

- Water insoluble and washout resistant
- Fully additive treated
- 100% synthetic
- High metal adhesion
- Excellent corrosion resistance
- Inhibited for H₂S and CO₂

Physical Properties:

- Color..... Light Brown
- Temperature Range -20 to 450°F
- Consistency, Cone Penetration (D-217) 170 to 190
- Drop Point, °C..... None
- Thickener..... Inorganic
