

## Technical Data Sheet

### FVL-OP196-CM Midseason

Frack Valve Lubricant

#### Description:

FVL-OP196-CM Midseason is highly resistant to water, acids, friction reducers, polymers, hydrocarbons and co-solvents commonly used in fracking operations. Fractastic H2O is inhibited against acid corrosion.

#### Applications:

For use in frack valves and pressure control applications.

#### Features:

- Water insoluble and washout resistant
- Fully additive treated
- 100% synthetic
- High metal adhesion
- Excellent corrosion resistance
- Inhibited for H2S and CO2

#### Physical Properties:

- Color ..... Cream color
- Temperature Range ..... -20 to 450°F
- Consistency, Cone Penetration (D-217) ..... 215 to 230
- Drop Point, °C ..... None
- Thickener ..... Inorganic
