

Technical Data Sheet

Everlast 4

Hydrocarbon Resistant Lubricant Sealant

Description:

Heavy duty plug valve grease formulated for hydrocarbons including aromatics, dilute acids and caustic service. It is waterproof, has excellent resistance to oxidation and high metal adhesion.

Applications:

For use in plug, ball and gate valves. Suitable for use in hydrocarbon liquids and gases. Do NOT use in oxygen service.

Features:

- Fully additive treated
- 100 % synthetic
- High metal adhesion
- Inhibited for H₂S
- Water resistant

Physical Properties:

- Color Brown
- Temperature Range-10 to 450°F
- Consistency, Cone Penetration (D-217) 150 to 200
- Drop Point, °C None
- Thickener Inorganic
