

Technical Data Sheet

Formasil CO2 Winter Grade

Valve Sealant

Description:

Formasil CO2 Arctic and Winter Grades are synthetic valve sealants formulated for use in highly corrosive, low temperature services. This product should be used to seal leaking plug valves and ball valves handling carbon dioxide, sour crude and gas, salt water, hydrocarbons, acids or caustic solutions.

Applications:

For use in plug, gate and ball valves in low temperature environments. Suitable for use in hydrocarbon gases. DO NOT use in oxygen service.

Features:

- Outstanding low temperature performance
- 100 % synthetic
- High metal adhesion
- Excellent sealing capabilities
- Inhibited for H₂S

Physical Properties:

- Temperature Range-40 to 350 F
- Consistency, Cone Penetration (D-217) 260 - 280
