

Technical Data Sheet

Fractastic H2O & WG

Frack Valve Lubricant

Description:

Fractastic H2O is highly resistant to water, acids, friction reducers, polymers, hydrocarbons and co-solvents commonly used in fracking operations. Fractastic H2O is inhibited against acid corrosion. Available in winter grade to < -40 F (Fractastic WG).

Applications:

For use in frack valves and pressure control applications.

Features:

- Water insoluble and washout resistant
- Fully additive treated
- 100% synthetic
- High metal adhesion
- Excellent corrosion resistance
- Inhibited for H2S and CO2

Physical Properties:

- Color..... Light Brown
- Temperature Range -20 to 450°F
- Consistency, Cone Penetration (D-217) 215 to 230
- Drop Point, °C..... None
- Thickener..... Inorganic
