

## Technical Data Sheet

### JL410 (Jack Leg Grease)

Lubchem Jack Leg Grease is a premium lubricant designed to be used on jack-up legs, spud barges and open gears. Lubchem Jack Leg Grease has superior EP properties, which provides lasting protection against wear. This marine grade lubricant is made with graphite, which provides film forming properties and enables it to provide high load carrying capacity. Lubchem Jack Leg Grease is heavier than water and will not cause a sheen on water if spillage occurs. This product contains rust inhibitors which protect against corrosive saltwater environments and extreme pressure additives. Lubchem Leg Grease is packaged with pail liner in 35 lb. pails for easy application and reuse of pail.

**SPECIFICATIONS:**

**Color: Black**

**Appearance: Smooth Consistency Buttery**

**Penetration @ 77° F: 265 - 295**

**NLGI Number: #2**

**Drop Point: (ASTM-D-2265) >350 F**

**Oil Separation (ASTM-D-1742): Less than 1%**

**Rust Preventative Properties (ASTM-D-1743): Pass**

**Flash Point: 395°F**

**Viscosity Index, Oil (ASTM-D-2270): 85 – 98**

**Water Washout Resistant: Yes**
