

Technical Data Sheet

Jet - Biodegradable Scale Remover

Description:

Jet Scale Remover is an organic acid based biodegradable scale remover. Jet Scale Remover is as effective as muriatic acid but is non-fuming and safer to use than strong inorganic acids. It is highly effective for treating and maintaining wells as well as removing scale build up on equipment and piping. Jet Scale Remover is inhibited against attack on ferrous metals which greatly reduces metal loss and will only remove scale and iron oxides. Jet Scale Remover is recommended for removal of calcium and magnesium scale from surfaces.

Features:

- Jet Scale Remover is a safe alternative to conventional hydrochloric acid.
- May be used in various well treatment programs and other applications where calcium carbonate scale is a problem
- Reduces need for additional inhibitor additives to protect well casings.
- Odorless formulation
- Biodegrades within 10 days
- Safe for use on most metals

Properties:

Composition.....	Proprietary/Trade Secret
Refractive Index (% wt.)	58.0 - 60.0%
Density 20°C (68°F), (g/ml)	1.11 (typical)
pH, 20°C (68 °F)	<1
Flash Point	None
Freezing Point	< -32° C (< -25° F)
Solubility in water	100%
Appearance.....	Yellow liquid

Storage: Keep container closed when not using. Store in dry areas with ambient temperatures

Shelf Life: At least 1 year

Packaging: 5-gallon, 55-gallon, 275-gallon totes

Transport (DOT): UN3265, Corrosive liquid, acidic, organic, n.o.s. (containing amines), 8, PGII
