

Technical Data Sheet

Magnaseal SP

Frac Valve Lubricant/Sealant

Description:

Magnaseal SP is a high tack lubricant and sealant for use in gate valves and plug valves in frac applications. It is resistant to shear and washout from turbulence, flow improvers, breaker fluids, co-solvents, dilute acids and caustics, and hydrocarbons. Magnaseal SP is inhibited for hydrogen sulfide and carbon dioxide. It is waterproof, has excellent resistance to oxidation and provides high metal adhesion.

Applications:

For use in frac valves and pressure control applications. DO NOT use in oxygen services

Features:

- Fully additive treated
- 100% Synthetic
- High metal adhesion
- Inhibited for acid services
- Biodegradable
- Insoluble in water

Physical Properties:

- Color..... Dark Gray
- Temperature Range..... -20 to 400°F
- Consistency, Cone Penetration (D-217)..... 250-270
- Drop Point, °C..... None
- Thickener..... Inorganic
